Project Description	GitHub Repository Link
GoaJebeukshuaohai	GitHub.com/jern81108/civix
Small farmers often can't identify crop diseases, pests, or nutrient deficiencies early, which leads to yield loss and wrong pesticide use. Kisan Vision lets a farmer snap a photo of a leaf or plant. Our AI model analyzes it and i	https://github.com/Aravindh-coder/kisan-vision-app
AI-powered government scheme navigator helping Indian citizens discover eligible welfare schemes, required documents, and official application links. 🇮🇳	https://github.com/harenjal24/sahaayak
💡 From directionless learning to job-ready clarity — one task at a time. During my recent development sprint, I noticed a common challenge among tech aspirants: Information overload without a clear, structured roadmap. 'REFIX is an AI-assisted web platform that helps users understand common electronic device problems and decide what to do next. Users can select their device, describe the problem, and receive a diagnosis with practical	https://github.com/dharmendra-0210/Career-compass-with-dharmendra
CivixLens AI addresses the problem of complex and difficult-to-understand civic and government information. Citizens often struggle to understand policies, public issues, and their potential impact because information is sc	https://github.com/Debit230/refix-hackday-git
Emergency callers panic, dispatch takes ~90 seconds, and cardiac-arrest survival drops 7–10% every minute without CPR. LifeLine is an AI emergency voice agent that performs rapid pre-triage with short yes/no questions,	https://github.com/choudharyanushka2323-sudo/civicens
FoodSaver is an AI-powered food-waste prevention platform that helps households reduce avoidable food waste by turning their food inventory into actionable decisions. Users can add or scan food, receive a "Use First" pri	https://github.com/kasanurinaaya-cloud/Food-Saver-git
WasteWise AI is an AI-powered waste management solution designed to help identify and classify waste more efficiently. The project addresses the problem of improper waste segregation, which can lead to inefficient recycl	https://github.com/hazalAI/Nachan/WaterWise
SmartClass is an intelligent classroom energy management system that monitors occupancy, electricity usage, lights, and fans through a single dashboard. It identifies avoidable energy consumption and provides smart reco	https://github.com/tamilselvikanagasabapathy-ship-it/smartclass-energy-management
SafeGrid AI is a web-based electrical safety risk awareness platform. It allows users to enter voltage, current, temperature and load type, then analyzes these conditions to generate a simple risk score and classify the situati	https://github.com/Tharshan-mp/safegrid-ai
NOVA × AEGIS is a trustworthy agentic AI system designed to move beyond traditional chatbots. NOVA acts as the intelligence layer that understands user intent, maintains context, plans multi-step tasks, retrieves informati	https://github.com/SakshamJain17/NOVAx_AEGIS
No	https://github.com/keerthikumararayanan-boop
KisanFlow addresses the challenge of making efficient irrigation decisions when farmers need to consider multiple field conditions such as crop, soil, moisture, temperature, rainfall and irrigation method. It is a climate-smart i	https://github.com/rainichalapaka/KisanFlow
Developed a Machine Learning-based Breast Cancer Diagnosis System using the Wisconsin Diagnostic Breast Cancer Dataset and Logistic Regression to classify tumors as benign or malignant. The model achieved high pri	https://github.com/NAVJEN-KUMAR/Breast-Cancer-Wisconsin-Logistic-Regression
CampusCare AI is an AI-powered smart campus assistance platform designed to make college life safer, easier, and more connected. It provides students with a single platform to report campus issues, get quick assistance,	https://github.com/Geetmodi06/Campus-care-AI?utm_source=chatgpt.com
Technical hiring and interview preparation suffer from critical inefficiencies and structural inequities on both sides of the table: 1. For Job Candidates: Traditional mock interview platforms are flat, text-heavy, and unrepresenta	https://github.com/RiyanshiVerma-11/Vocalls-AI
ResQGrid (CrisisPulse) addresses the critical communication and coordination challenges faced during disasters such as floods, cyclones, and earthquakes, especially when cellular networks, internet connectivity, and powe	https://github.com/nikhilgupta9555/ResQGrid_Project-git
Problem: Traditional cloud-based SAST security tools (like Snyk or SonarQube) require uploading sensitive, proprietary source code to remote servers. This introduces significant data privacy risks, network latency, high infras	https://github.com/doluzar219-ux/VIBE-SHIELD
WeCare is a smart healthcare platform designed to make healthcare access simpler, faster, and more connected. It connects patients with hospitals, doctors, appointments, digital health records, video consultations, AI-base	https://github.com/Aouraghkhoragade/Phoenix
Silent Symptom addresses the problem of patients struggling to communicate scattered, recurring symptoms clearly during medical consultations. Users can log their symptoms in simple everyday language, while AI organiz	https://github.com/shreyas2707-github/silent-symptom
CareerTwin AI addresses the problem of students and early-career professionals struggling to choose suitable career paths due to limited personalized guidance, unclear skill gaps, and fragmented career information. It is an	https://github.com/careertwin-ai/lovables-app/
Problem : As AI becomes more capable of performing actions for users, it may take important actions without the user fully realizing the risks. Actions such as purchases, sending emails, uploading files, or sharing personal i	https://github.com/pranavsidharth6-alt/AI-FIREWALL-EXTENSION
GeoEcho – AI-Powered Search Area Prioritization & Evidence Mapping GeoEcho is an AI-powered search decision-support system designed to help police, search-and-rescue teams, emergency command centers, and NGOs	https://github.com/yamin242008-cyber
CivixFlow is an AI-powered civic issue reporting and resolution platform that connects citizens with the right authorities to make public problem solving faster and more transparent. Citizens can simply upload a photo of issu	-
CivConnect is a community-focused web platform designed to help citizens stay informed and connected with local civic activities. It provides information about community issues, upcoming civic events, and a way for use	https://github.com/cviva8870/civicconnect
AI-generated voices from tools like ElevenLabs and OpenAI TTS have gotten so good that you genuinely cannot tell them apart from real people anymore. This is already being used for phone scams, identity fraud, and sprea	https://github.com/Unknown-x1/HackDay-26
Early detect forest fires and crop pests using sensors. Real-time threat detection is isolated—leaving farms and forests vulnerable to cross-boundary risks.	https://github.com/Jeevikah22/GreenGuard_AI
Educational institutions often waste electricity because lights, fans, and other electrical appliances are left ON in empty rooms. Manual monitoring makes it difficult to identify and control this wastage. Smart Energy Guardian	https://github.com/prithika2322-jpg/AgentGuard-AI-git
TRACE is an AI-assisted digital content provenance and forensic analysis platform. Instead of returning only a simple real-or-fake verdict, it investigates how digital content evolved, what changed, and how the current versio	https://github.com/Moukhiha/Trace-Content
CIVICFLOW AI addresses the gap between reporting civic problems and getting them resolved. Citizens can submit a photo and description of issues like potholes, broken streetlights, garbage, or water leakage. Our AI anal	https://github.com/keeshavtech/CIVICFLOW
CivixLens AI is an AI-powered civic issue reporting platform that helps users identify and report real-world problems such as road damage, waste accumulation and infrastructure issues. Users can upload an image, receive a	https://github.com/ummekulsumg/civixlens-ai
Every year in India, thousands of crores in central government, state government, corporate CSR, and philanthropic scholarships go unclaimed simply because students are unaware of their eligibility or get overwhelmed by	https://github.com/Ashtutosh-Singh/Hack1Day-Project
QueueLess is a digital queue management platform designed to reduce unnecessary physical waiting. Users can instantly get a digital token, track their live queue position and estimated waiting time, and arrive when their tu	https://github.com/Sandilyakavi/Queueless-smart-Queue-Token-Management
Many organisations struggle to identify the skills and potential already available within their workforce. Employees' capabilities are often hidden behind job titles, making internal role matching and skill-gap identification diffic	https://github.com/rahahini-1021/talentbridge
""CrashGuard"" addresses the problem of delayed accident detection and emergency response caused by fragmented road-safety systems. It works as an "AI-powered smart dashcam and safety platform" that continuously	https://github.com/manasie997-lab/crashguard
Problem: Maintenance issues like water leakage, broken lights, garbage overflow, and infrastructure damage are often reported manually, causing delays, incorrect department assignment, and difficulty in locating the exact	https://github.com/eevthapriya240/FixFlow-AI
CityShield is an AI-powered urban safety platform designed to address fragmented city safety information. It allows citizens to explore safety conditions, report incidents, identify risk-prone areas, use safer-route intelligence,	https://github.com/durgaprasad010605/City-Shield.git
Guardian is an AI-powered, location-aware platform that helps organizations identify, prioritize, track, and resolve physical infrastructure, safety, accessibility, and sustainability issues across multiple locations. Users can rep	https://github.com/sayonesneha-csa-guardian
GreenFix AI is an AI-powered platform that helps identify and report environmental and public-space problems using photos. Users can upload or capture an image of issues such as overflowing waste bins, illegal dumping,	https://github.com/25it102-ux/greenfix-ai
During emergencies, people often face information overload and uncertainty about what to do first. ResQFlow AI is an AI-powered emergency decision-support platform that converts a user's emergency situation and vulner	https://github.com/charan174/resqflow-ai
Small and marginal farmers often face difficulties in choosing suitable crops, identifying pests, understanding weather conditions, soil requirements, and finding current market prices. Our solution is an AI-powered, multilingu	https://github.com/gunupavithra2005/desi-agro-guide-git
More than 825 million people worldwide live with a visual impairment, yet online chess platforms like Chess.com and Lichess are built around a board you have to see. Blind players usually rely on screen readers that read the	https://github.com/Aral-549/voicechessmate
ExamAlert AI is an automated, zero-hallucination tracking platform designed to ensure Indian competitive exam aspirants never miss critical deadlines. By continuously monitoring official government portals (gov.in, nic.in,)	https://github.com/Anirvan2006/Amvgv-git
Problem: Campus issues like broken lights, poor cleanliness, water problems, and weak Wi-Fi are often reported through informal channels, making them difficult to track, prioritize, and resolve. Students may also have no cl	https://github.com/vishalkrishnar24.github.io/campuscare/
The Problem: India's 12 million local Kirana stores rely on handwritten Bahi-Khata (credit ledgers) and are losing ground to quick-commerce platforms. The barrier to digital entry is too high; shop owners lack the time and tec	https://github.com/dheendadhayan071-dsbug/vyaparvision/
CivixFix is an AI-powered civic issue reporting platform. Users upload or capture a photo of problems like potholes, garbage, or broken streetlights, and AI identifies the issue and generates a structured report. Problem: Rep	https://github.com/manav-gupta1/CivixFix
Legal contracts form the backbone of every business relationship, yet the vast majority of small businesses, startup founders, and independent professionals in India sign them without truly understanding what they are agree	https://github.com/mudit108-code/LEXAGUARD-AI
An AI-based flash-flood risk prediction and early-warning system that fuses rainfall, terrain and historical flood data into one clear, location-aware risk view.	https://github.com/sivalateshinagarajnaidu-cv/vu30548_collab_flashflood-prediction-system
AI-Powered Skill Helper Matching Platform, Project Description: SkillSOS is a smart platform that connects people with the right skilled professional when they face everyday problems or emergencies. Instead of requiring i	https://github.com/vishika15/SkillSOS.git
The Problem I Solved If you ask any college student or professor today, they will tell you how frustrating it is to manage campus life. Students have to open one website to check attendance, another to download lecture note	https://github.com/Abhaviv/v/Campus.git
"AI Crop Health Assistant" is a smart farming solution designed to help farmers detect possible crop health problems at an early stage. Farmers can simply take a photo of a crop leaf and upload it to the system. AI analyzer	https://github.com/deepak062006/crop_health
SafePulse addresses the limitation of traditional safety systems that rely mainly on manual SOS alerts. It uses GPS, movement, route, event and user-response data with AI-based risk assessment to detect potential danger, i	https://github.com/deep77294/safepulse
Problem: Satellite-based thermal detections generate many scattered hotspots, but a hotspot alone doesn't tell us what type of event it represents, how risky it is, or whether the activity may continue. Manual analysis can als	https://github.com/Yashika-ar/FlareEye
Millions of families depend on their local ration (PDS) shop for rice, wheat, sugar and kerosene, but there is no way to know beforehand whether the shop is open or has stock. Daily-wage workers and elderly residents often	https://github.com/vmahalakshmiip2025-coder/Ration-Radar-Know-Before-You-Go-git
QRShield is a Java-based security project that analyzes QR-code content and URLs for common suspicious indicators before a user follows them.	https://github.com/kiyuthikrs0503-png/QRShield-Smart-QR-Code-Fraud-Detection-System.git
## ShadeShift – Project Description "ShadeShift" is a forecast-based heat-risk planning tool designed to help outdoor workers decide "when to work and when to avoid peak heat". Instead of simply showing the weather	https://github.com/shawaristi13/ShadeShift
Problem Addressed: Traditional corporate security training relies on static, generic phishing templates that employees easily predict. These outdated methods fail to prepare staff for modern, highly-targeted social engineering	https://github.com/Shivam-Khade/PhishGuard
FoodRescue is a community food rescue platform designed to reduce food waste and connect surplus food with people and organizations who need it. Restaurants, hostels, events, caterers, and individuals often have safe	https://github.com/maddewadwajuta/FoodRescue
Finding reliable workers for short-term or local jobs can be difficult, while workers often struggle to find suitable job opportunities in their area. To address this, we developed "WorkLink", a simple service marketplace that c	https://github.com/kalishag1618/WorkLink.git
During emergencies, people often face information overload and uncertainty about what to do first. ResQFlow AI is an AI-powered emergency decision-support platform that converts a user's emergency situation and vulner	https://github.com/charan174/resqflow-ai
SkillIDNA is a career discovery tool that helps students uncover skills they may not realize they have. It uses 10 real-life situations to build a skill profile and suggest career paths that match their strengths, with a clear explana	https://github.com/jashuababina/skilldna-hackday
"Problem": "Environmental problems are interconnected, but existing tools often analyze soil, water, climate, and biodiversity separately. This makes it difficult to understand how one environmental change affects others and	https://github.com/ashad355/GeoReason
Mera Hak is a web app that helps victims of non-consensual image sharing or deepfakes navigate takedown steps. It guides users through intake Q&A, evidence logging with SHA-256 hashes, complaint drafts, and a 24-hou	https://github.com/saksham22139-mp/html-project.git
Problem: Students and users often struggle to identify the causes of everyday problems and find clear, practical solutions quickly. Existing information can be scattered and difficult to apply to their specific situation. Solution:	https://github.com/vishwakaaarya708-sys/ANALYZE
.	https://github.com/Nisarg5120/Medorea-health.git
WasteWise AI addresses the problem of incorrect waste segregation caused by confusion about waste categories and proper disposal methods. Our solution uses AI-powered image analysis to identify waste from an upload	https://github.com/Shalish2007/wastewise-ai
SkillBridge - Project Description Problem: Many students, fresh graduates, and young professionals struggle to turn their education into real opportunities. There is a clear skill gap between what they know and what the mar	https://github.com/Tanajitroy/SkillBridge
SUVAKTA addresses the lack of objective, personalized, and continuous feedback for improving communication skills. Students, job seekers, and professionals often struggle to identify weaknesses in areas such as speaki	https://github.com/vishabhain0106/SUVAKTA-
NAMI is a web-based application designed to help individuals and small businesses record and manage their payment transactions in a simple, organized, and reliable way. Users can securely log in and enter transaction det	https://github.com/v7vivex/HACK-DEVENGERS-2.0
Problem: Students struggle to understand the difference between education and career options available to them. Solution: PathWise provides multiple pathways instead of recommending just one career. Key Features: Career paths, el	https://github.com/onkaspoojitha/AI-powered-career-guidance-platform.git
LifeLink is an AI-powered emergency blood donor matchmaking system designed to help identify suitable donors quickly during critical situations. It combines blood-group compatibility, ML-based urgency and donor-availab	https://github.com/shrivignesh07100006-droid/Life-link
NutriSafe AI is built around a simple problem: most people want to make better food choices, but understanding calories, nutrients, ingredients and expiry dates can be confusing and time-consuming. The app lets users tak	https://github.com/ershobhit17/NutriSafe-AI.git
Problem: The internet has evolved into an active psychological battlefield. Every day, millions of users are manipulated by "dark patterns"—deceptive UI designs meticulously engineered to steal money, harvest credentials, a	https://github.com/CodeWithKR-09/humina-security-engine/tree/main
CarePath is a patient care coordination dashboard designed to help teams manage care plans more efficiently. It centralizes tasks, appointments, patient documents, alerts, and readiness insights in one place, making it easi	https://github.com/Sreeval20/erqoc
OFFLOOP addresses the problem of mindless scrolling on social media, where platforms are designed to maximize time spent rather than meaningful use. Our solution detects prolonged, continuous use and interrupts the lo	https://github.com/valid-right/OFFLOOP
JobShield is a student-focused platform that helps college students, freshers, and internship seekers verify online job and internship opportunities before applying. Existing solutions often verify only whether a company exist	https://github.com/dmitryashree/jobshield
An interactive, responsive web platform designed to inspire, organize, and track community-driven actions for positive social and environmental impact.	https://github.com/Sneha4961/world-better-maker
ElderCare-360 is a smart mobile application designed to support elderly people living alone and help their families monitor their well-being remotely. The platform enables families to stay connected with elderly members throu	https://github.com/ananthayogibhadevi-sketch/ElderCare-360
India is home to over 101 million citizens living with diabetes, yet has fewer than 25,000 ophthalmologists, with over 70% concentrated in metropolitan areas. Over 65% of rural Primary Health Centres (PHCs) lack reliable inte	https://github.com/Abinay2107/retina-screen-ai
Problem Statement: Over 60 million tonnes of e-waste are generated globally each year, and most of it ends up in landfills — not because it's unusable, but because people don't know what's salvageable or where to take it.	https://github.com/CVNareshniran/Second-life-e-waste
Problem: During natural disasters, pandemics, and emergencies, misinformation spreads 6x faster than truth. False claims cause panic, wrong decisions, and deaths. Pakistan floods 2022: False "don't drink tap water" claim	https://github.com/deena-30-05-07/crisisverify.git
Local Food Bridge bridges the gap between surplus food and community needs through a zero-friction, AI-driven Progressive Web App (PWA): Snap & Upload: Food donors take a single photo of their excess food. Instant AI	https://github.com/Meiyammal-hub/hackday1.0.git
LostLink is an AI-assisted secure lost-and-found platform that helps users find, match, verify, and safely recover lost belongings. It uses AI to identify potential matches between lost and found items, while private ownership	https://github.com/pranavmandate251/LostLink-Secure-Lost-and-Found
ReFind AI – An AI-powered, privacy-first Lost & Found recovery network that matches lost and found items, verifies rightful ownership, enables secure communication, and tracks the complete journey from Lost → Matched	https://princemusajc2008-ctrl.github.io/ReFind-AI/
Nexus AI addresses a common friction point in how people use AI today: switching between separate tools for chatting, generating images, and building presentations. The platform unifies these three workflows into a single	https://github.com/padmakumar9101-ai/SkillSwap
The problem we are addressing is that professional tutoring and mentoring can be incredibly expensive, especially when someone only needs 30 to 80 minutes of specific, quick help. Even though there are plenty of people e	https://github.com/prachinmenaria11-bit/sehat-pulse
Villagers don't get to meet doctors or miss appointment so this provide them with early status and availability in city hospitals	https://github.com/Shawathere/ClearSign
PROBLEM: People sign contracts they can't fully understand, and hidden auto-renewals, penalties and one-sided clauses cost them money, rights and deadlines, especially those with low legal or financial literacy. SOLUTION	https://github.com/mosalmam710/scheme-saathi
Many families miss government benefits because they don't know which schemes they qualify for, and the information is scattered across portals in English. Scheme Saathi is a multilingual (English, Tamil, Hindi) web app wh	https://github.com/hallarahu/sanchar
Frontline health workers often work in areas with unreliable or no internet connectivity, making digital data collection difficult and prone to delays or data loss. SANCHAR is an offline-first PWA that lets workers record field vis	https://github.com/Niran2006/FloodGuard
FloodGuard addresses the problem of people receiving general flood warnings without knowing the actual risk on their street or what action to take. It combines weather, rainfall, satellite, sensor, map and citizen data to unde	https://github.com/vishvaanbagajane-rqb/Polar_nexus_portal
An integrated AI-powered research and educational platform that provides secure access to polar climatic data, scientific publications, and interactive exploration of Arctic and Antarctic regions.	https://github.com/ST-Team14/stratguard-AI
StratGuard AI is an AI-driven energy supply chain resilience platform that helps organizations monitor geopolitical and corridor risks before they disrupt energy movement. It combines risk intelligence, scenario simulation, re	https://github.com/jashwanthega0719-creator-/KrishiRakshak-AI.git
Farmers often struggle to identify crop diseases at an early stage because symptoms can look similar and expert agricultural support may not be immediately available. Delayed detection can lead to crop damage, reduced y	https://github.com/udayshankar/citycompass-
It's a website which makes people from around the world visiting karnataka easy	https://github.com/Rubansamuel/SMARTMARKETPLACEPLATFORM
Smart Marketplace Platform	https://github.com/sonasreeja-70/SpendWise-AI-Powered-Financial-Awareness-Budgeting-As
SpendWise is a simple financial awareness assistant built to help students and young adults understand where their money is actually going. Many of us spend small amounts every day without realizing how quickly they add	https://github.com/vbansushri-hash/studyflow-ai
StudyFlow AI is an AI-powered adaptive study companion that creates personalized study plans based on a student's subjects, goals, deadlines, availability of time, and academic priorities. It combines AI planning, task manage	https://github.com/Sakshi-kosbe/ScriptClear.git
ScriptClear is a frontend-based medication safety and prescription management platform designed to make complex medication information easier to understand and follow. It helps users organize their medicines, view clea	https://github.com/Nishu1270/pantadhara.git
Chilli and Turmeric farmers in Andhra Pradesh (specifically the Guntur, Duggirala, and West Godavari / Tadepalligudem belts) face extreme seasonal price volatility. During post-harvest glut, prices often crash by 25%-35%.	https://github.com/sri-darshan-tech/QueueLess-smart-digital-queue-management-system
QueueLess is a smart digital queue management system that replaces traditional waiting lines with virtual queues. Users can digitally generate a token, track their position, view estimated waiting time, and receive notification	https://github.com/chandrimath789-collab/skillinterest/Path/tree/main
SkillInterestPath is a web-based career planning platform designed to help students choose a suitable tech career and follow a structured learning path. Students select their career goal, enter their current skills and learning	https://github.com/Deepak230107/AI-Farmer-query-support-git
FarmerBot is an AI-powered agricultural advisory system designed to help farmers get quick, simple, and personalized farming guidance in Malayalam and English. Farmers can interact with the system through text, voice, or	https://github.com/sec24cs083-lab/agricheck-pwa

| Problem Statement : For decades, the Indian agricultural supply chain has been highly fragmented and unfair. Farmers toil to grow produce but receive a fraction of its true value due to a multi-layered network of middlemen and corrupt intermediaries. When disaster strikes, information becomes chaos. Emergency responders receive fragmented reports from citizens, social media, emergency calls, voice notes, field teams, sensors and satellite imagery. IncidentZero is an autonomous SRE platform powered by Google Gemini AI and Java Spring Boot that detects and auto-heals infrastructure errors in real time.

 | https://github.com/sanishkachaudharyvrm-cmyk/KrishhSync |
| HomeGuard AI is an AI-powered visual safety screening solution that analyzes room images to identify common visible household hazards such as exposed wires, overloaded extension boards, blocked pathways, slippery floors, and fire hazards. Infra-Pulse is an AI-powered Civic Nervous System that bridges the gap between citizens and the government. Citizens often struggle to report local issues due to language barriers and complex forms, while government portals are often inaccessible to the elderly and disabled. HearNote tackles the difficulty deaf and hard-of-hearing students have following live lectures when captions or accessible notes aren't available. Note-taking gap: Writing notes while listening makes students miss important information. Live instrument telemetry for Antarctic research stations via RSS feeds, with resilient local backup. Bringing dependable, real-time instrument visibility to the most remote place on Earth. System0 is a lightweight application for detecting and reporting cyber threats in real time.

 | https://github.com/Tanya-garg10/HomeGuard-AI-AI-Powered-Home-Safety-Visual-Screening-g |
| FoodLoop Global Project Overview FoodLoop Global is an AI-powered food waste reduction and redistribution platform designed to tackle the global problem of food wastage while helping communities facing food insecurity. Modern civic maintenance in campuses and urban communities suffers from a critical paradox: authorities are buried in duplicate complaints while remaining blind to real-world urgency. Traditional systems queue unstructured requests, leading to inefficiency and frustration. CivicFix AI is an AI-powered civic issue reporting and management platform designed to make reporting local problems easier, faster, and more transparent. Citizens often face issues such as potholes, garbage accumulation, and safety concerns. In the first hours of a flood, landslide, fire or missing-person incident, lives are lost to coordination rather than to a shortage of responders: reports arrive as vague descriptions, coordinators pick units by memory and radio, and response times are delayed. PeoplePay360 – HR & Payroll Operations Platform PeoplePay360 is an integrated HR and payroll platform designed to make everyday employee management and salary processing simpler, more connected, and more reliable. CivicFix transforms scattered citizen complaints into organized, prioritized civic issues using AI, location-based duplicate detection, and transparent municipal workflows. SecureCheck addresses the problem of weak, reused, and easily guessed passwords, which cause the majority of account breaches. It's a web app that analyzes password strength in real time (checking length, character variety, and common patterns). ProofGov AI addresses fraudulent or unverifiable civic work completion claims. It uses before-and-after images, SHA-256 hashing, anti-spoofing checks, and SSIM-based visual analysis to verify work and maintain an audit trail. CIVCLENS AI transforms a simple civic-issue photograph into an intelligent, location-aware, prioritized incident report that can guide appropriate authority action. SachCheck is an AI-powered claim verification system that helps users check suspicious forwarded messages, social media claims, and online information. Users can paste a message or upload a screenshot, and SachCheck verifies its authenticity. The Experience Gap in Youth Hiring: India has a huge pool of young job seekers, yet hiring still depends on resumes, credentials and interviews. Freshers can't prove their skills without experience, employers can't verify skills without experience. During disasters, communication breakdowns and delayed rescue operations cost lives. ResQ-AI is an AI-powered emergency management system that aggregates real-time distress signals, prioritizes life-threatening situations, and coordinates rescue efforts. RescuEZ is a web-based emergency assistance platform designed to help users quickly seek and access emergency support during critical situations. It provides a simple and user-friendly interface for reporting emergencies, requesting help, and receiving updates. KalaKriti is a resilient, open-access web repository and digital sanctuary built to preserve, document, and showcase India's rich traditional and tribal art heritage. From the vibrant narrative scrolls of Phad to the rare castor-oil paintings of Pattachitra, KalaKriti ensures that India's cultural treasures are preserved for future generations. ProofChain is an AI-powered digital verification platform designed to detect, analyze, and verify the authenticity of digital content such as images, videos, documents, and online evidence. The platform uses AI-based analysis to identify deepfakes, manipulated content, and suspicious patterns. Land acquisition delays are ultimately a data visibility problem hiding inside a governance problem. BhuNirvighna-AI is a step toward closing that gap - not by replacing the judgment of administrators, but by giving them the tools to make better decisions. TravelAble addresses the lack of reliable, centralized, and up-to-date accessibility information for persons with disabilities, elderly travellers, and individuals with specific accessibility needs. Accessibility details about tourist destinations, transportation options, and local services are often scattered and outdated. SmartFlow addresses the problem of inefficient irrigation, unnecessary water usage, rainfall uncertainty, and unsafe motor operation due to low tank water levels. It is an adaptive smart irrigation system that analyzes soil moisture levels and weather patterns to optimize water distribution. PaisaWise is a simple financial decision-making tool that helps users make informed choices every day – whether to buy something, take an EMi, or trust a message – but financial information is often complicated or arrives too late. PaisaWise is a simple financial co-pilot that helps users make better financial decisions. ProofGov AI addresses fraudulent or unverifiable civic work completion claims. It uses before-and-after images, SHA-256 hashing, anti-spoofing checks, and SSIM-based visual analysis to verify work and maintain an audit trail. AGRICYCLE is an AI-powered agricultural crop-residue-to-resource platform that helps farmers find valuable uses and suitable buyers for crop residue after harvesting. It estimates the available residue, matches farmers with potential buyers, and facilitates transactions. Evaluating whether a user can afford an expense requires looking far beyond their current account balance. A user might have \$2,000 in the bank, but if \$1,800 is already earmarked for rent, utilities, loan repayments, and groceries, the available disposable income is much lower. NutriWise is an efficient webapp which can personalize our diet plan especially for those who are sick/recovering. It meal plans our whole day according to our needs and we don't have to move to different apps this will provide us with a personalized diet plan. Accessing legal help is often hindered by complex legal jargon, lack of transparent pricing, difficulty in finding the right legal expert, and weak credibility verification for advocates. VakilSetu addresses these challenges through a user-friendly interface, transparent pricing, and a network of verified legal professionals. It is an AI-powered Antarctic navigation support system that detects and tracks icebergs, monitors sea-ice and weather conditions, predicts risks, and provides safety warnings to ships for safer navigation. EcoSort Vision is an Edge AI-powered waste classification platform designed to solve the problem of improper waste segregation at the source. Citizens often struggle to identify the correct bin for recyclable, organic, hazardous, and e-waste. The Problem: During rapid-onset natural catastrophes (earthquakes, tsunamis, flash floods), emergency management systems face high latency, fragmented data across siloed agencies, and uncoordinated resource allocation. AgriSmart AI is an AI-powered agricultural platform that helps farmers detect crop diseases, identify plant health issues, and get practical treatment and prevention guidance. It combines disease detection, weather analysis, and market insights. Problem Statement : Millions of people receive scam messages every day, and many have no one to ask. Fake KYC alerts, UPI "cashback" tricks, parcel fees and job offers reach people by SMS and WhatsApp. Older adults, who are more vulnerable to scams, often lack the digital literacy to recognize and report these threats. Problem: Disease outbreaks are noticed late because illness reports are scattered, unverified and hard to compare against what's normal for a ward. Residents can't tell if illness in their area is unusual, and authorities can't act quickly enough. Problem: During emergencies, finding a suitable ambulance, choosing the right hospital, and navigating traffic can waste critical time. Existing tools often work separately, causing delays. Solution: We developed "LifeLine + Fire" – a unified emergency response platform. EvChain, publicly branded as SakshyaSutra, is a secure digital evidence integrity and chain-of-custody platform. Digital evidence such as CCTV footage, images, documents, audio files, screenshots, and forensic records can be securely stored and verified. Unused phones, laptops and other electronics often sit at home because people do not know where or how to dispose of them responsibly. Informal disposal can lead to lost reusable devices, unsafe handling and unnecessary e-waste. Findora.AI addresses the problem of fragmented online discovery, where users must switch between multiple platforms to find internships, hackathons, jobs, products, courses, scholarships, news, and nearby services. Our goal is to create a unified platform where all these resources are easily discoverable. When developers join a new project, they face hundreds of files with no clear map. They can't see how files depend on each other, don't know where to start reading, and can't tell which files are risky to change. Outdated or conflicting code can lead to bugs and delays. Problem Public procurement officers, vendors, and PSUs face significant inefficiencies when manually identifying applicable Bureau of Indian Standards (BIS) for complex tender specifications. This manual search process is time-consuming and prone to errors. TreeDoctor is an AI-assisted urban tree health monitoring platform. Anyone can photograph a tree, and the system returns a health score, the visible signs of stress it observed, possible contributing factors, a confidence level, and recommended actions. TheraPose AI uses real-time, on-device pose estimation to guide patients through prescribed therapy exercises safely at home – no expensive equipment, wearables, or clinic visits required. The app tracks joint angles and movement patterns to ensure exercises are performed correctly. The Problem: Traditional environmental reporting shifts the blame onto individual citizens while ignoring corporate waste. Furthermore,
existing automated tracking tools frequently violate privacy laws (like GDPR) by capturing and storing sensitive location data. ReLoop AI is a circular economy platform that helps users decide what to do with unwanted items by recommending reuse, repair, refurbishment, or recycling, while helping them find nearby destinations and track their environmental impact. I developed an adaptive image steganography system that securely hides encrypted text inside images. Unlike basic LSB methods, our solution selects suitable pixels based on image characteristics such as edges and textures, ensuring the hidden message remains undetectable. AI-Based Child Safety System is an intelligent child identification and attendance management platform that combines AI-powered face recognition, RFID technology, guardian verification, and automated notifications to support parents in ensuring their children's safety. "FocusGuard" is a smart digital wellbeing app designed to help users take back control of their attention. It blocks distracting apps like Instagram and YouTube during focus sessions and can go further by targeting addictive apps. ProofFix addresses the difficulty of reliably diagnosing and fixing software bugs with AI. Instead of generating unverified code changes from a single prompt, it uses an orchestrated multi-agent pipeline to analyze repositories, reproduce issues, and propose fixes. Apna Rozgaar is an AI-powered inclusive job platform designed to address the barriers faced by people with disabilities during job searching and hiring. The platform helps users discover relevant job opportunities while using accessibility features to ensure a seamless experience. CivicShield is an AI-powered civic incident response platform that classifies, assesses, routes, and plans responses to civic incidents. It combines AI agents, deterministic risk analysis, critical-infrastructure awareness, and human oversight. CampusPulse is an AI-powered campus safety and infrastructure reporting platform designed to make issue reporting faster, clearer, and easier to track. Students and staff can report problems such as damaged infrastructure, safety concerns, and campus events. Problem: Plantation drives announce how many trees were planted, but nobody checks how many survive. Plant and remedy claims also spread with no evidence or safety warnings. [Our idea: GreenRoots gives every tree a digital identity and ensures its survival. MachineGuard is a smart machine-health monitoring platform that analyzes vibration data to detect abnormal machine behavior, identify early warning signs of potential failures, and recommend timely maintenance actions. SYNOCORA addresses the problem of losing important context from conversations and having to repeatedly explain goals, preferences, and tasks. It provides a simple platform that captures conversation text, automatically extracts key information, and provides a searchable summary. The Problem : 1. "Hidden Leaks:" Water pipes leak silently inside walls or underground. Nobody notices until there is major water damage or a giant water bill (over 35% of clean water is wasted this way). 2. "Blind Tanks" Habits like eating well, exercising, studying and sleeping on time are easy to plan but hard to keep. To-do apps only tick a box, so a task feels like the same on day 1 and day 30 and motivation fades. ShadowQuest turns daily life into a game where completing tasks earns points and unlocks rewards. EcoSpace AI is an AI-powered urban resilience platform designed to combat the Urban Heat Island effect by helping citizens instantly visualize a greener future. How it works: Users upload photos of barren concrete spaces, and the platform suggests and tracks the progress of greening efforts. Problem: Medical prescriptions in India are often handwritten or filled with confusing clinical shorthand (OD, BD, TDS, AC/PC), leading to medication errors, missed doses, and poor adherence – especially among elderly patients. FORM BHARO is a GenAI-powered form-filling assistant that turns complex PDF forms into a simple conversational experience. Users upload a form and answer easy questions instead of manually decoding every field. The Problem : "VAP2WRAP" is an AI-powered learning platform designed to make learning from long educational videos faster and more effective. Students often spend hours watching lectures and additional time preparing notes and revising. CivicVoice addresses the problem of inefficient and difficult civic issue reporting, where problems such as potholes, waste, water leaks, unsafe areas, and broken streetlights can be difficult to report and track. CivicVoice provides a simple, intuitive interface for reporting issues. SHADOW is a smart local repair and service platform that helps people find reliable electricians, plumbers, mechanics, and appliance technicians. The platform addresses common problems such as lack of trust, uncertain availability, and high costs. Problem: People increasingly store important documents, digital assets, and personal information online, but there is often no secure and organized way to manage these assets if they become unavailable. Families and businesses need a secure way to store and retrieve their digital assets. Urban civic systems are broken by high complaint volume, zero prioritization, and no real-time transparency, causing delayed resolutions and weak accountability. CityConnect solves this with an AI-powered, end-to-end civic issue reporting and resolution platform. Digital fraud, digital arrest scams, counterfeit currency, and organised scam networks are increasing, while law enforcement often acts only after victims are affected. Our solution is an AI-powered public safety platform that can detect and prevent such threats. Problem : Urban waste management suffers from inefficient collection, poor route planning, delayed issue reporting, and limited real-time monitoring, leading to overflowing waste and unnecessary fuel usage. . Solution – SmartWaste AI is a GenAI-powered form-filling assistant that turns complex PDF forms into a simple conversational experience. Users upload a form and answer easy questions instead of manually decoding every field. The Problem : "VAP2WRAP" is an AI-powered learning platform designed to make learning from long educational videos faster and more effective. The Problem : "VAP2WRAP" is an AI-powered learning platform designed to make learning from long educational videos faster and more effective. Students often spend hours watching lectures and additional time preparing notes and revising. CivicVoice addresses the problem of inefficient and difficult civic issue reporting, where problems such as potholes, waste, water leaks, unsafe areas, and broken streetlights can be difficult to report and track. CivicVoice provides a simple, intuitive interface for reporting issues. SHADOW is a smart local repair and service platform that helps people find reliable electricians, plumbers, mechanics, and appliance technicians. The platform addresses common problems such as lack of trust, uncertain availability, and high costs. Problem: People increasingly store important documents, digital assets, and personal information online, but there is often no secure and organized way to manage these assets if they become unavailable. Families and businesses need a secure way to store and retrieve their digital assets. Urban civic systems are broken by high complaint volume, zero prioritization, and no real-time transparency, causing delayed resolutions and weak accountability. CityConnect solves this with an AI-powered, end-to-end civic issue reporting and resolution platform. Digital fraud, digital arrest scams, counterfeit currency, and organised scam networks are increasing, while law enforcement often acts only after victims are affected. Our solution is an AI-powered public safety platform that can detect and prevent such threats. Problem : Urban waste management suffers from inefficient collection, poor route planning, delayed issue reporting, and limited real-time monitoring, leading to overflowing waste and unnecessary fuel usage. . Solution – SmartWaste AI is a GenAI-powered form-filling assistant that turns complex PDF forms into a simple conversational experience. Users upload a form and answer easy questions instead of manually decoding every field.
